# Lights

*Our lighting department delivers complete production solutions for festivals, concerts, corporate events, and large-scale shows. We work with advanced moving heads, wash and spot fixtures, architectural LED systems, strobes, blinders, and laser technology, all integrated through professional control systems and wireless DMX networks. From creative lighting design and 3D visualization to technical planning, rigging, programming, and live operation, our team ensures precision, safety, and maximum visual impact. Every setup is engineered to enhance the stage architecture and create immersive atmospheres tailored to each event.*

# Lighting Production & Design

Festival stage productions delivered at the highest professional standards. We provide complete technical packages including stage structures, roofing systems, professional sound systems, lighting design, LED screens, power distribution, and full stage engineering. Our team has been involved in some of the most important festivals and large-scale events in Romania, ensuring flawless execution, safety compliance, and seamless coordination from planning to showtime.

## Temple Stage Kapital

Complete technical production including high-impact lighting design, laser systems, large-scale LED integration, and powerful sound reinforcement, delivering an immersive festival experience at one of Romania's major electronic music events.

## AER Stage Rasova

A refined open-air stage setup combining dynamic lighting, precision laser programming, LED visual architecture, and crystal-clear sound systems, tailored to enhance the premium electronic atmosphere of the event.

## Loft Stage 1'st May

Full club-stage production featuring intelligent lighting, laser effects, LED visual elements, and high-performance sound engineering, creating an intense and immersive beachfront party environment.

# Kinesis Orbisfly

A dynamic kinetic experience  
of light and motion

Orbisfly is a revolutionary kinetic lighting system designed to transform any space into a three-dimensional visual experience. Combining suspended RGB LED spheres with motorized winches controlled via DMX or dedicated software, Orbisfly brings to the stage a spectacular choreography of light and movement.

| COD                 | DESCRIPTION   | OBSERVATIONS |

 2 x 150m optical cable on drum

# Sound Engineering Where Power Meets Precision

Enables immersive audio experiences  
with dynamic control and clarity.

## FOH Control & Show Management

Our FOH Control & Show Management setup ensures centralized coordination of audio, video, and lighting systems within complex live productions. Equipped with professional mixing consoles, media servers, video switchers, and real-time control platforms, it enables precise synchronization and seamless content execution.

Designed for reliability and full system integration, our FOH solutions guarantee stable performance, smooth transitions, and complete technical oversight throughout the entire event.

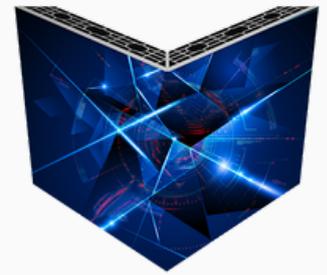

# Video

## LED SCREEN

*Professional LED screens from Absen, with over 1,500 sqm of modular panels available from our own inventory. We provide complete infrastructure: video processors, rigging structures, power distribution, transport, installation, and on-site operation. Scalable solutions for conferences, festivals, product launches, and large-scale corporate productions, delivered to premium industry standards.*

# DMX-Controlled Sliding Track System

Engineered Mobility  
& Precision

The sliding track system represents an advanced technological solution for the precise and dynamic movement of LED screens during live shows, corporate events, or exhibitions. Controlled via DMX protocol, it allows seamless integration into complex stage designs, synchronizing screen movement with lighting and sound for a powerful visual impact. The motion is smooth and accurate, ideal for fluid transitions and impressive scenic effects, offering exceptional creative flexibility in production design.

# DMX-Controlled Sliding Track System

Dynamic stage movement and technological versatility

The sliding rail system for LED screens is a professional solution that allows controlled horizontal movement of video panels, enabling real-time transformation of the event space. This system is ideal for productions that require adaptability, synchronization with other stage elements, and strong visual impact.

Whether used for a concert, conference, product launch, or exhibition show, the sliding rail allows the screen movement to be fully integrated into the overall show direction. Through electronic control (DMX or other protocols), the motion can be automated and synchronized with lighting effects, sound, or video mapping, contributing to a cohesive and spectacular multimedia experience.

## Mobility & Precision

The movement is smooth and silent, making it suitable for both large-scale outdoor stages and more compact environments such as TV studios or conference venues.

# Rigging

**Movecat, Exe Technology, CM Lodestar**

**VERLINDE Stage Maker 2500kg**

We provide professional rigging solutions designed for large-scale productions, festivals, and complex stage environments, ensuring maximum safety, precision, and load control. Our inventory includes industry-leading motors from Movecat, EXE Technology Rise D8+ 2000kg DC, and VERLINDE Stage Maker 2500kg (30m).

These high-performance chain hoists allow secure lifting and positioning of trusses, LED walls, audio systems, and scenic structures, meeting strict European safety standards. Our rigging packages include full planning, load calculations, certified equipment, and experienced technicians, delivering reliable structural support for demanding live productions.

We provide professional truss and structural rigging solutions designed for large-scale productions, festivals, corporate events, and complex stage environments, ensuring maximum safety, structural integrity, and design flexibility.

Our inventory includes high-quality truss systems available in both silver (natural aluminum) and black powder-coated finishes, suitable for indoor and outdoor applications. We offer circular truss structures with diameters of 3m, 4m, 6m, 9m, 11m, and 46m, ideal for creating impressive lighting rigs, stage crowns, suspended LED structures, kinetic elements, and immersive scenography.

# Layher

## SCAFFOLDING

*We provide professional structural solutions built with premium systems from Layher, internationally recognized for strength, modularity, and safety. Layher structures are ideal for stage substructures, FOH towers, delay towers, platforms, technical decks, and complex event builds.*

*The modular design allows fast assembly, high load capacity, and flexible configurations tailored to each production. Our Layher systems are delivered with full technical planning, certified components, and experienced crews, ensuring stability, safety compliance, and efficient execution for festivals, large-scale events, and corporate productions.*

# Tents

## & Logistics

*We provide professional tenting and dome solutions designed for festivals, corporate events, exhibitions, and large-scale outdoor productions. Our portfolio includes geodesic dome structures with diameters of 6 m, 7 m, 11 m, and 22 m, available in both standard configurations and amphitheater layouts.*

*Engineered for structural strength, weather resistance, and visual impact, our domes can be fully integrated with staging, lighting, LED systems, branding elements, and audience seating. Delivered with complete technical planning, certified structural calculations, and experienced installation crews, our dome solutions ensure safety, versatility, and premium execution for any type of event.*

# Access

## & Lifting Equipment

*We provide professional access and lifting solutions essential for efficient and safe event production. Our fleet includes aerial work platforms (AWP), telehandlers, and forklifts, ensuring precise handling, lifting, and installation of trusses, LED screens, stage structures, and heavy technical equipment.*

*Designed for reliability and performance in demanding environments, our machinery supports fast build-ups and complex site operations. Operated by experienced personnel and integrated into our full production workflow, our access and lifting equipment guarantees safety, efficiency, and smooth execution on every project.*

# Power Distribution

*We provide professional power solutions designed for festivals, concerts, and large-scale corporate events. Our generator fleet ensures stable and continuous energy supply, while our certified power distribution systems are engineered for safe and efficient load management across lighting, audio, LED screens, and stage equipment.*

*From main power generation to fully configured distribution networks, we handle planning, load calculations, cable routing, backup systems, and on-site technical supervision. Our solutions guarantee operational reliability, safety compliance, and uninterrupted performance for demanding live productions.*

# NAN Warehouse & Transport

Our logistics infrastructure ensures safe, efficient, and timely delivery of all technical equipment nationwide. We operate dedicated transport solutions for LED screens, audio systems, lighting equipment, stage structures, and rigging components, handled by experienced crews.

All equipment is stored in organized, professional warehouse facilities using flight cases and secure storage systems to maintain optimal condition. From dispatch planning to on-site deployment and post-event handling, we provide complete logistical support, guaranteeing reliability and operational efficiency for every production.

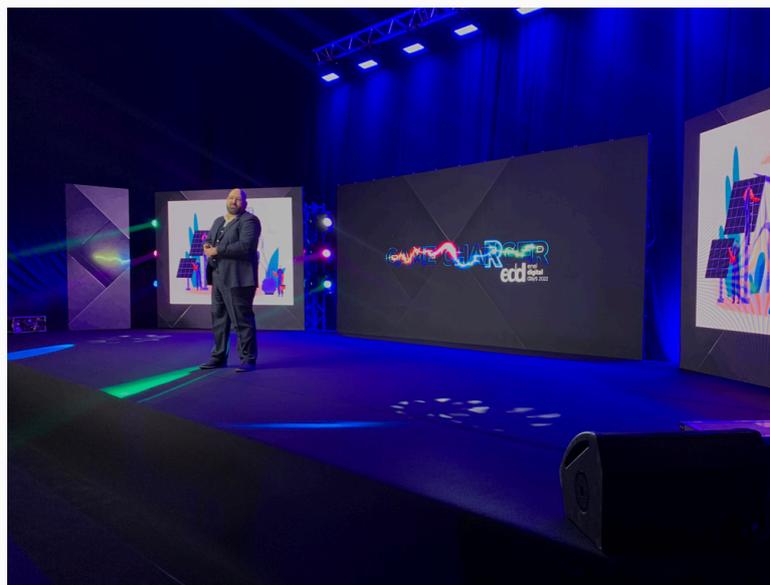

# NAN STUDIO

Complete live  
streaming solution

Fully equipped studio for any type of video or photo project - 1,000 sqm available.  
TV commercial shoots, podcasts, and TV/online shows.  
Hybrid or fully online events.

Chroma Key set-up measuring 16x5m, with the possibility of live graphic integration in real time during online streaming.

# Acrobatic Moments

Artistic event  
logistics

To turn every artistic moment into an unforgettable show, we have developed a dedicated and easy-to-follow logistics system. Every detail - from stage and equipment preparation to the synchronization of activities - is carefully planned to ensure optimal conditions for the performances. This allows our artists to focus entirely on their creative work, confident that everything is perfectly in place. This integrated approach enables us to organize artistic moments, such as the Acrobatic Moment, with precision and professionalism, delivering a unique and memorable experience for the audience.

# Complete Logistics for Acrobatic Shows

Bring your boldest artistic ideas to life with a complete logistics system for acrobats, designed to support aerial performances, spectacular entrances, or high-impact stage moments. From silent, electronically controlled motors to modular scaffolding, professional pulleys, and redundant safety systems, we provide everything needed for a memorable show – with full safety and millimeter-precise accuracy.

## Professional electric motors

Professional Electric Motors - fast lifting, DMX or manual control, soft stop.

## Modular scaffolding and metal structure

Modular Scaffolding and Certified Metal Structure - configurable for any stage space.

## Pulley and trolley system

Pulley and Trolley Systems – for smooth, controlled movements and aerial stage design.

# Laser Show & Mapping

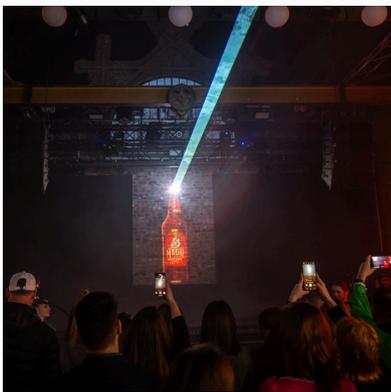

Innovation and Visual impact

The laser show delivers a spectacular visual experience, blending technology with artistry in a dynamic display of light, shapes, and colors that transforms any event into a memorable moment. Perfectly synchronized beams of light with the music create captivating, dynamic, and unique effects for every stage appearance.

Laser mapping takes things to the next level, enabling high-precision projections onto 3D surfaces or architectural structures, creating optical illusions and custom animations that come to life. It is the ideal solution for product launches, corporate events, artistic performances, or memorable brand campaigns.

# Visual Show with Latest Generation Technology

A Laser Show is a light choreography composed of high-power laser beams, perfectly synchronized with music, special effects, or stage moments. The systems used can create shapes, text, 3D graphics, volumetric effects, or light tunnels, all programmable according to the show direction.

## Laser mapping

Laser Mapping Over Video - Perfect Synchronization, Maximum Impact.

## Photo activation Laser

Laser Photo Activation - Interactive Visual Experience.

## Timecode Laser

Laser Timecode - Perfect Synchronization in Multimedia Shows.

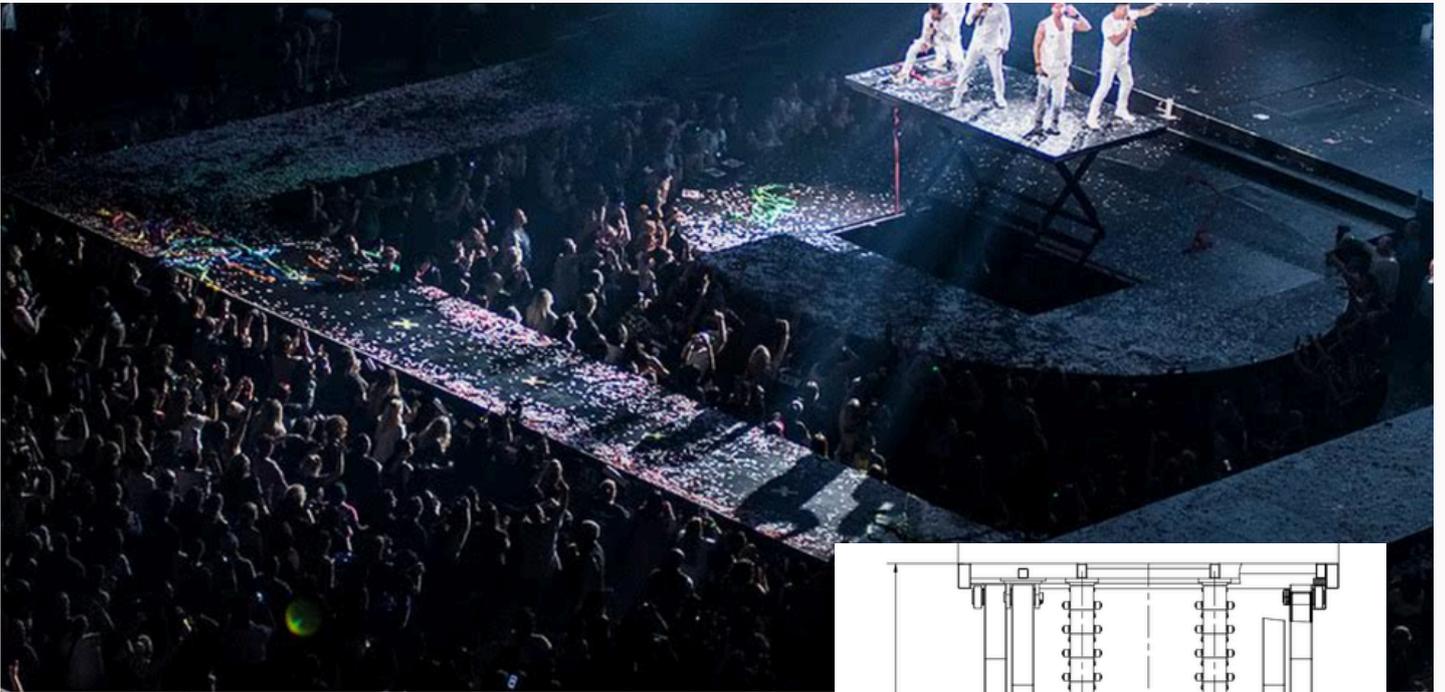

# Electric Powered Lifting Platform

DMX Control

Height up to 3.5 m

An innovative solution for stage setup and spectacular effects, this electric lifting platform with DMX control is specially designed for live productions that demand precision and visual impact. Engineered to meet modern technical requirements, the platform provides vertical lifting of up to 3.5 meters, allowing seamless integration into dynamic stage designs and choreographed moments.

DMX 512 control enables synchronization of movements with lighting, sound, or video systems, creating smooth transitions and precisely choreographed effects. Thanks to its quiet operation, the platform can be used during the show without disrupting the atmosphere or the artistic performance.

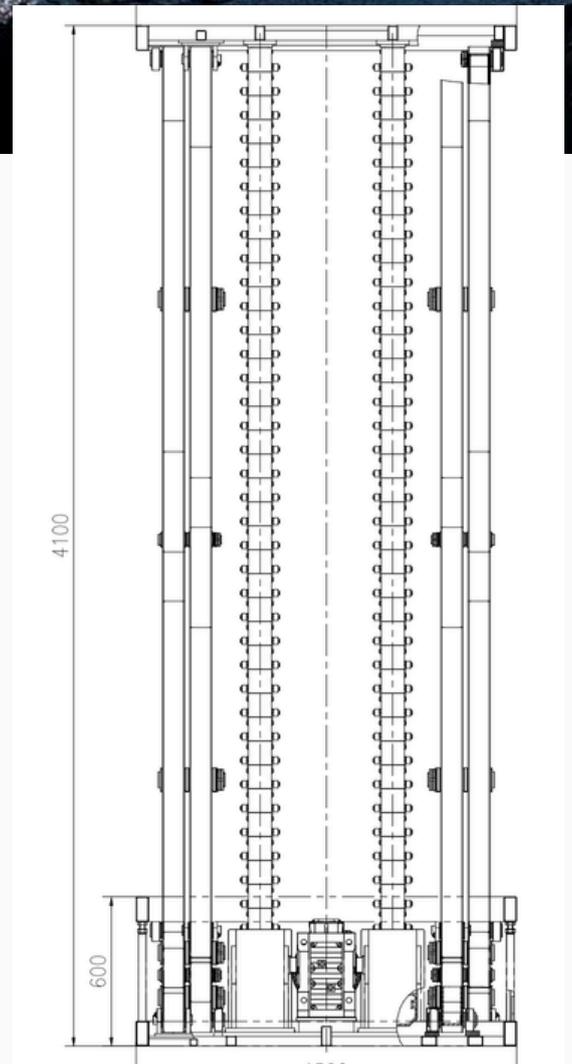

# Lifting with DMX Control

Height up to 3.5 m

Transform the way you manage key moments in your events with a DMX-controllable electric lifting platform, specially designed for stage use. With a lifting capacity of up to 3.5 meters, this platform delivers a dynamic and precise experience, perfect for synchronization with lighting, sound, special effects, or mobile set pieces.

This technical solution is the ideal choice for event directors, multimedia show creators, and organizers looking to add extra visual impact, precision, and professionalism to their productions. Fully controllable via the DMX 512 protocol, the platform can be seamlessly integrated into existing lighting or stage control systems, providing a high level of automation and flexibility.

## Compact and robust design

Fast and Silent Movement: ideal for use during events without interruptions or acoustic disturbance.

# Mobile platform with wireless guidance

Transform the way you build shows and presentations with a wireless-controllable mobile stage platform, perfect for modern events, artistic productions, or product launches. This advanced technological solution allows the movement of sets, performers, or equipment directly on stage, with full remote control - no cables or manual intervention required.

# What is the mobile wireless platform?

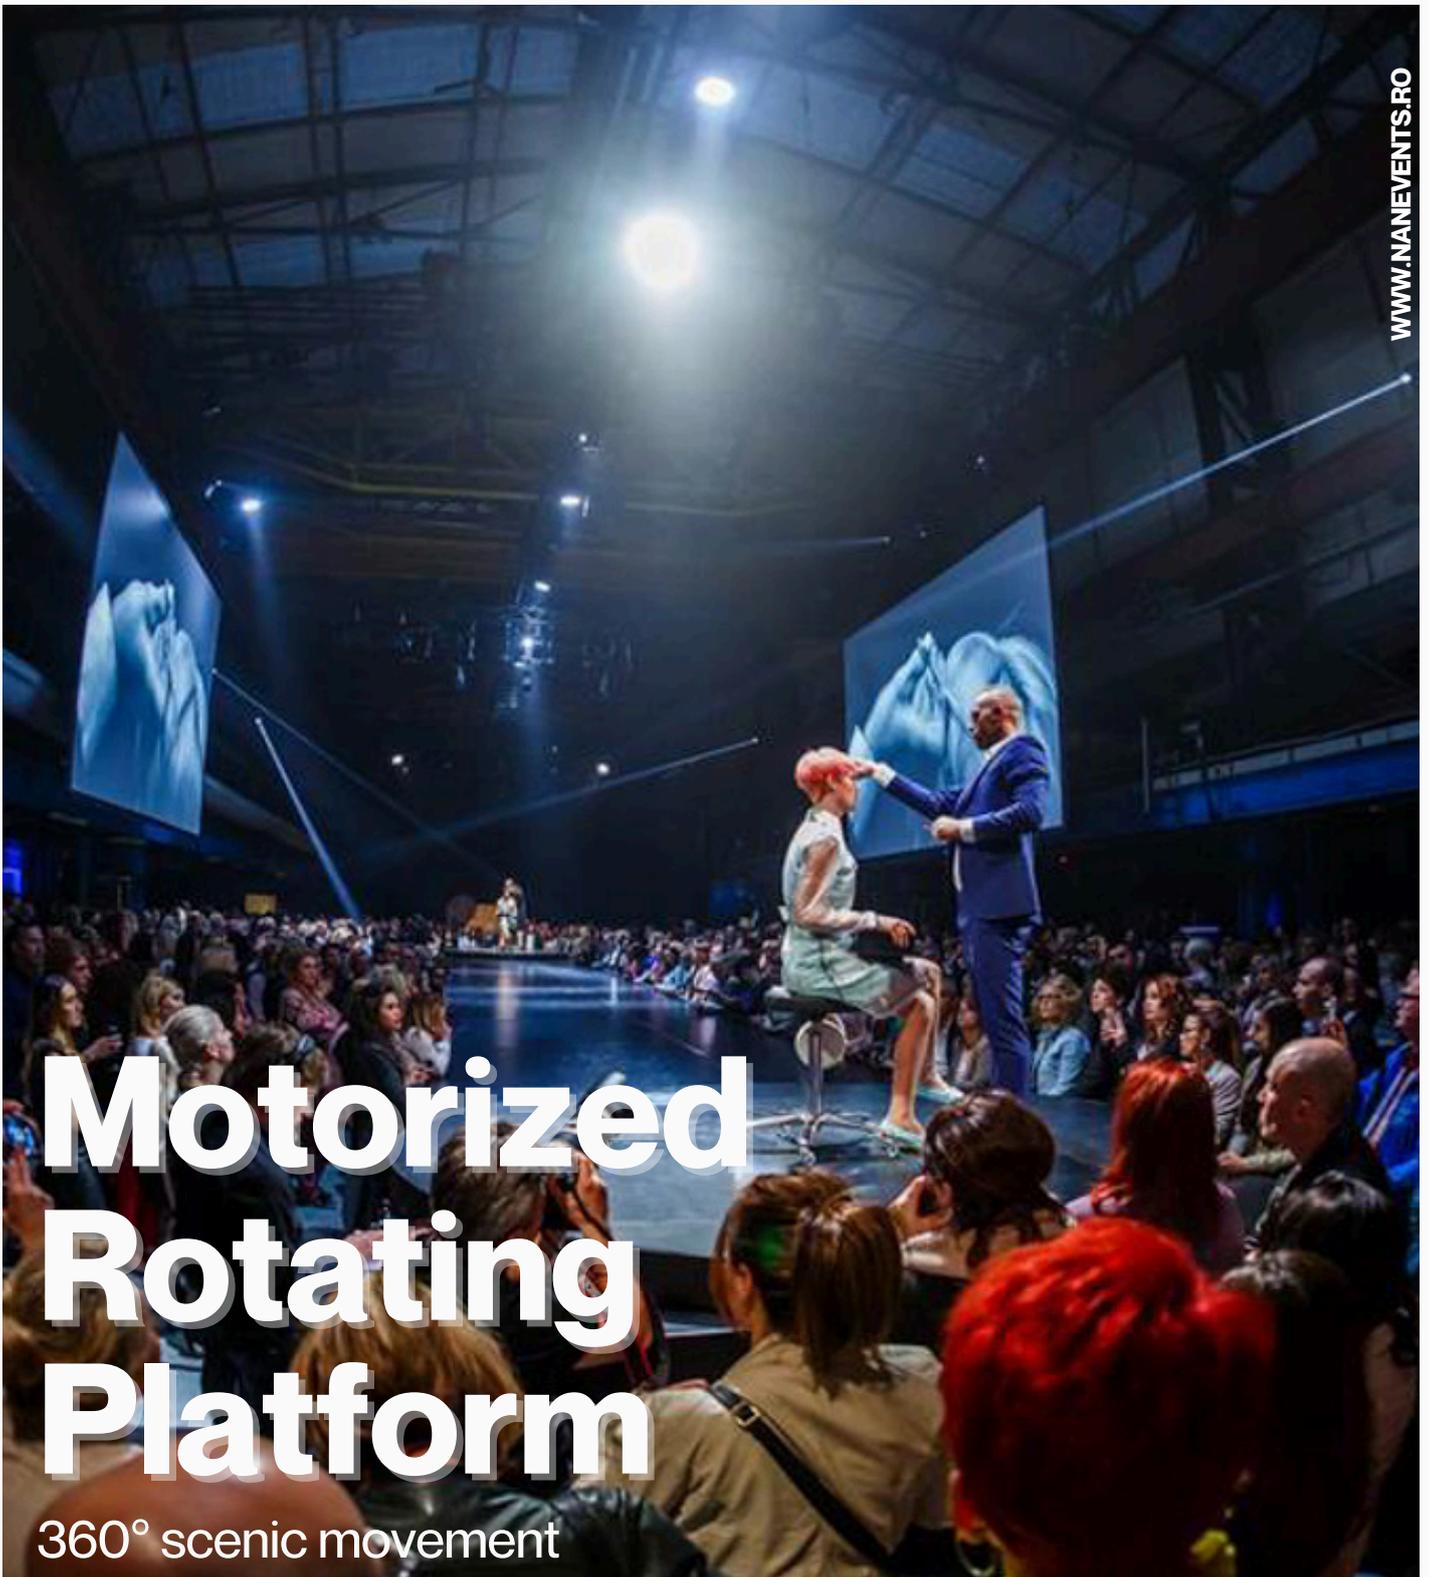

the technical production team can precisely control every movement

The wireless mobile platform is an advanced stage device, also known as an autonomous mobile riser, designed to add smooth, remotely controllable stage movement to any type of event. Specifically engineered to operate cable-free, the platform uses an integrated electric propulsion and steering system and is controlled via a wireless joystick or a professional radio remote with long-range capability.

This platform can move in all directions (forward, backward, sideways, diagonally, and rotate on the spot), offering 360° mobility and impressive maneuverability. Its motion is extremely smooth and silent, making it suitable for use during live moments without disrupting the performance, sound, or overall atmosphere.

- invisible movement of a set piece or stage element, without visible personnel on stage;
- stage transport of a performer or product during a precisely choreographed moment;
- complex choreographies or technical directing, where synchronization is essential.

# Motorized Rotating Platform

360° scenic movement

Maximum visual impact

Add dynamism, elegance, and a “wow” effect to any stage production with a professional rotating platform, specially designed for live events, product launches, multimedia shows, or high-end exhibitions. This revolutionary equipment provides smooth, fluid, and fully controllable circular movement, helping create unforgettable moments and showcasing every stage element or product with maximum impact.

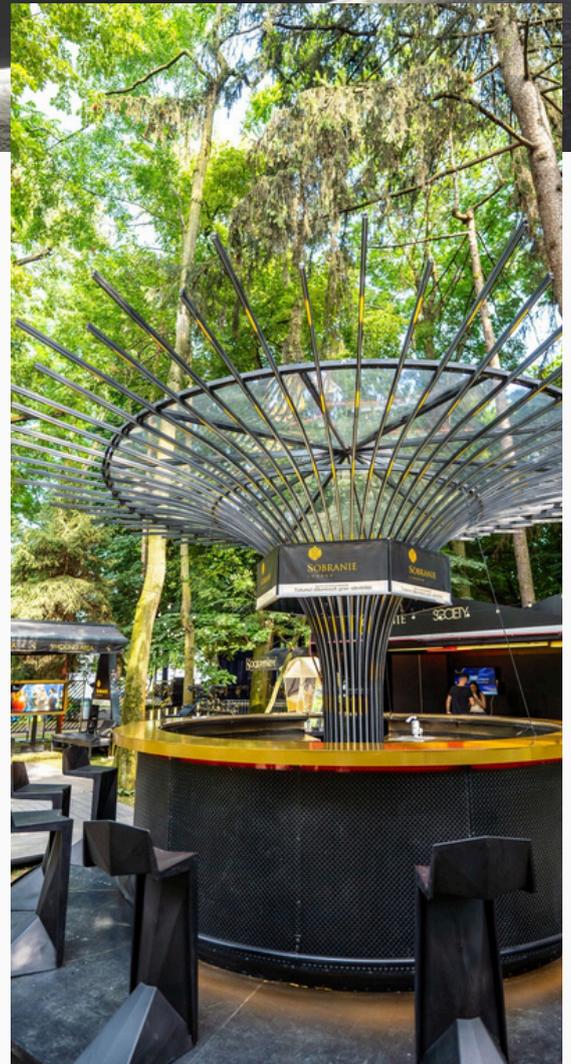

The platform allows full 360° rotation at an adjustable speed and is designed to operate silently, ensuring seamless integration into complex technical cues without disrupting live moments. Whether used to showcase a car, a luxury product, a performer, or a dynamic set piece, this platform transforms the stage into a vibrant, spectacular, and sophisticated element.

# Full Rotation 360°

Designed to support heavy loads

The rotating event platform is a professional stage solution, ideal for product launches, live shows, exhibitions, and multimedia productions that require controlled movement and spectacular visual effects. With a generous 5-meter diameter, this motorized platform allows full 360° rotation, with adjustable speed and programmable stops, easily adapting to any artistic or commercial concept. It is perfect for showcasing large products, set pieces, or performers. The rotating platform adds depth and elegance to technical direction, enhancing the visual impact of every moment and delivering a memorable experience for the audience.

- Product launches - cars, gadgets, luxury items;
- Corporate events - 360° presentations, main guest introductions;
- Fairs and exhibitions - furniture, equipment, industrial design presentations;
- Live shows and multimedia performances - stage movement of performers or set pieces;
- TV productions, shows, or commercials – dynamic shots, rotational effects.

# LED Mesh 3D

Scenic Movement

Maximum Visual Impact

The LED mesh is a revolutionary modular digital display system, featuring a flexible, lightweight, and transparent design. Engineered to meet modern design and functionality requirements, this technology offers a unique combination of high-quality visual performance and adaptability to any type of surface – flat, curved, or irregular. It is the ideal solution for integration into media architecture projects, dynamic stage design, or interactive art installations.

Composed of interconnected LED nodes in a mesh network, this structure allows the creation of large-scale video surfaces while maintaining transparency and light passage, making it perfect for building facades, stages, or exhibition stands. Thanks to its lightweight and modular design, installation is fast, and integration can be achieved without compromising architectural aesthetics or spatial functionality.

# LED Mesh – Combines Architecture with Digital Magic

allows the implementation of organic and interactive shapes with reactive lighting effects.

## **Create Volumes of Light. Activate Emotions.**

This technology enables the display of video content, animated graphics, special effects, or dynamic messaging, with low energy consumption and brightness levels high enough to remain visible even in strong ambient light. Additionally, the LED mesh is compatible with modern control systems (DMX, ArtNet, Media Server), allowing seamless integration into complex multimedia shows.

## Nan Events – Soluții Complete Pentru Evenimentele Tale!

Cine suntem noi?

Nan Events este mai mult decât o simplă agenție de logistică pentru evenimente – suntem **partenerul tău** de încredere, pregătiți să gestionăm fiecare detaliu al evenimentului tău, de la concept până la execuție. Oferim **soluții integrate, 360°**, pentru orice tip de eveniment.

Avem **tot ce este necesar** pentru succesul evenimentului tău: operatori specializați, echipamente de ultimă generație, utilaje performante și transport logistic propriu. Totul este centralizat la **Nan Events**, pentru ca tu să beneficiezi de un eveniment perfect gestionat, fără griji, de la început până la final.

**Departamentul nostru de creație** joacă un rol esențial în procesul de organizare. Transformăm ideile tale în realitate prin **schițe bine gândite, simulări 3D realiste și soluții complete de stage design**, oferindu-ți o viziune clară asupra evenimentului înainte de implementare. Gândim scene care comunică, care inspiră, care pun în valoare mesajul tău și creează o experiență memorabilă pentru public.

Deținem unul dintre cele mai vaste și bine structurate **cataloge de logistică** pentru evenimente din România, capabil să răspundă oricărei nevoi – de la echipamente tehnice de ultimă generație, la mobilier adaptat, decoruri personalizate și structuri specializate pentru orice tip de spațiu. Fiecare proiect este realizat cu meticulozitate, îmbinând expertiza cu o dedicare totală.

Cu o **experiență vastă** în industria evenimentelor și o echipă pasionată, transformăm ideile tale în realitate, oferind soluții adaptate nevoilor tale. Fiecare eveniment este unic, iar misiunea noastră este să-l facem memorabil, care va impresiona atât publicul, cât și partenerii tăi.
